**Student Achievement Information for William Land Elementary**

District students take the *Stanford Achievement Test, 9<sup>th</sup> Edition*, as part of California's Standardized Testing And Reporting (STAR) system. Several types of scores can be reported. We are reporting the average student's achievement for each grade at your school. The average student's achievement in each grade for the past three years at your school can be compared with the average achievement in the district and in California.

**Average Student Performance in Reading and Math for 3 Years, using National Percentile Ranks**

The scores in the table below show the average student's National Percentile Rank (NPR) in reading and math for the past three years for the grades in your student's school. Students in nearly all district schools have shown improvement between 1998 and 2000 in reading and in mathematics. Your individual student's test report can be compared with these average national percentile ranks for your school and for the district. The district's goal is to have nearly all students scoring at or above the 50<sup>th</sup> national percentile rank.

**Student Performance on the Academic Performance Index (API)**

Although the Academic Performance Index (API) is based upon the same test (SAT9) as the *Average Student Performance* information presented above, it uses a different method of computation. The API is a combination of scores on several test sections (reading, language, spelling and math for grades 2-8), reading, language, math, science and social science in grades 9-11). Student scores are weighted to better show improvement from a lower score to a higher score. This weighted combination of scores forms a special number called an "index". The API index for a school can range from 200 to 1,000. Your school's Academic Performance Index in 1999 and 2000 is given in the table below. A 5% growth target was set by the state for school improvement between these two years. The growth target is given as well as the actual growth achieved by students in your school.

<b>School</b>	<b>% Tested</b>	<b>2000 API</b>	<b>1999 API</b>	<b>Growth Target</b>	<b>Growth</b>
William Land	96	705	672	6	33
Median in District	99	648	586	11	56

The table below includes the comparison rankings for your school. Schools are compared (1) with all schools at that level in the state—the Statewide Rank comparison and (2) with the 100 most demographically similar schools—the Similar Schools Rank. These comparison ranks go from 1 (lowest) to 10 (highest).
