## Board Policy

### District Technology Plan

BP 0440

#### **Philosophy, Goals, Objectives and Comprehensive Plans**

The Governing Board recognizes that technology can greatly enhance the instructional program as well as the efficiency of district and school site administration. The Board also realizes that careful planning is essential to ensure the successful, equitable and cost-effective implementation of technology-based materials, equipment, systems and networks.

The Superintendent or designee shall develop a plan to address the short- and long-term technology needs of the district and provide for compatibility of resources among school sites, district offices, and other district operations. As a basis for this plan, he/she shall examine and compare the costs and benefits of various resources and shall identify the blend of technologies and level of service necessary to support the instructional program.

(cf. 6162.7 - Use of Technology in Instruction)

(cf. 6163.4 - Student Use of Technology)

The plan should be reviewed regularly to keep up with ongoing changes in technology. Funding sources should be pursued to help support the technology effort.
