

WHY?

California Ed Code section 52060(d)(6) requires every LEA in the state administer a school climate survey to the students, teachers, and families it serves and use the results to (1) inform decision making in the LCAP and (2) guide how LCFF funds are utilized. The student survey is designed for students in grades 3 through 12. The survey should take approximately 20-30 minutes to complete.

STUDENT CLIMATE SURVEY

The student survey will be taken on-line through a Google form. Students will need to log-in to Google prior to taking the survey. This will allow for detailed and various aggregation of student responses to inform the District's LCAP and other decision making processes. Student responses will only be analyzed and reported at the school-level.

Students need to complete the survey by June 1, 2017. Middle and high schools may select a subject course such as English to administer the survey. Schools could also choose to designate laptops in cafeterias or media rooms as a central survey location to cycle students through.

A letter informing families of the student survey and allowing parents/guardians to opt-out of their child taking the survey must be emailed to families, posted on school websites, and/or sent home with students. If opt-outs are received, please forward them to Box 808 (Serna Center).

A paper copy of the student survey should be made available at the front office for review if requested.

Each school that has at least 70% of their eligible students participate in the survey will receive \$1000 toward improving student outcomes.
