---

**Word of the Month**

**alégresance**

1. The loyalty of a citizen to his or her government.
2. Loyalty or devotion to some person, group, cause, or the like.

---

**SWEET TOOTH**

The Honey Badger of Africa and Asia is really closer to a weasel than a true badger, but one thing about its name is definitely true: the honey badger loves honey and will avidly seek out beehives to get at it. Of course, the honey badger will also eat pretty much anything it finds -- rodents, frogs, snakes, insects, turtles, birds, lizards, eggs, vegetables, and whatever else it comes across. They’ve even been known to chase away young lions and steal their kills. Guess the honey badger really doesn’t care!
