The Compensation and Risk Management Department has distributed a limited supply of Student Insurance information and applications to your school. You will only need to include the parent/guardian letters in your first day packets, informing them of the low-cost student accident insurance. We appreciate your continued cooperation in the distribution of this very valuable information.

The procedure is due to the low participation in the program which provides low-cost coverage for most accidental injuries to students while at school. The district and your site have no coverage or means to assist with student injury expenses. We are continually working together to find good coverage at low-cost for students’ parents/guardians.

Student Insurance information and applications are also available through the internet at www.studentinsuranceagency.com under K-12 Plans. The applications include a self-addressed mailer that will be mailed directly to the insurance company. In order to avoid liability issues and the assumed connections with the carrier, the district no longer accepts applications at the sites.

Applications should be distributed to any parent/guardian upon request. Please destroy any applications or claim forms from prior years.

Should you have any questions, please call Martine Kruger at the Compensation and Risk Management Department at 643-9421.
