Board Policy

Curriculum Development And Evaluation

BP 6141

Instruction

The Governing Board accepts responsibility for establishing what students should learn. The Board shall adopt a district curriculum which reflects district philosophy, aligns to district standards, responds to student needs and abilities, and is consistent with the requirements of law. Insofar as possible, this curriculum shall also reflect the desires of the community and the needs of society as a whole.

The Board considers curriculum to be a top priority for the district. Curriculum adoption, development and evaluation will therefore be an ongoing process in the district, routinely supported by planned allocations of resources and staff time.

The Board may establish a curriculum review cycle for comparing each area of the curriculum against state model curriculum standards and Board policy.

(cf. 6178 - Vocational Education)

The Superintendent or designee shall establish procedures which ensure that the curriculum adoption, development and evaluation process includes input from teachers, administrators, students and parents/guardians from all grade levels, disciplines, schools, special programs and categories of students as is appropriate for the materials under consideration. The development or selection of instructional materials shall be coordinated with the district standards and student assessments.

(cf. 6161.1 - Selection and Evaluation of Instructional Materials)

The Superintendent or designee shall keep the Board informed about student achievement and student, staff, parent and community response to the proposed curriculum in each area of the curriculum. The Superintendent or designee also shall support the Board's efforts to discuss this information with district staff before adopting the district curriculum.
