

COVID-19 Testing for Teachers/Staff FAQ

Sacramento County is providing all teachers and school site staff access to dedicated, no-cost COVID-19 testing. This program is an important factor in being able to help to ensure COVID-19 cases are isolated to prevent outbreaks.

These testing sites are NOT for: travel clearance; surgery clearance (Contact your health care provider); people with severe fever, cough, or other symptoms. (Contact your health care provider); or, people that have tested positive for COVID-19 within 10 days of the testing date.

Can I bring my family members for testing?

- Yes, you can! Please sign up your family to get a testing appointment here:
https://www.saccounty.net/COVID-19/Pages/Symptom-Screening_MobileTestingSite.aspx

What should I bring with me?

- Any age with a form of identification with a name and a birthday.
- U.S. Citizenship or legal residency is not required.

I don't feel sick can I still come in?

- Yes, people with no symptoms or with mild/moderate symptoms can get tested at this site.
- However, people with severe symptoms should contact their healthcare providers.

What should I expect at my appointment?

- Anyone coming in for a test will be expected to maintain social distancing, and wear a face covering at the testing site. A mask will be made available if you don't have one.
- Bring a form of identification with a date of birth to check in at your appointment.
- A qualified healthcare provider will administer the nasal swab collection procedure.
- The test takes no more than 60 seconds from start to finish. You may be at the site longer to check-in, finish up registration and get prepared for your visit.

How will I get my results?

- If you test positive - a doctor will call you directly to notify you of your results and the next steps you should take. You will also receive an email from Stem Express with a copy of your results.
- If you test negative - Stem Express will email you with the status of your results.
- Provide both a phone number and an email address so we can get in touch with you quickly.
- All testing results are confidential.

What should I do if I test positive?

- Stay home, most people with COVID-19 have mild illness and can recover at home without medical care. Do not leave your home, except to get medical care. Do not visit public areas.
- Take care of yourself. Get rest and stay hydrated. Take over-the-counter medicines, such as acetaminophen, to help you feel better.
- As much as possible, stay in a specific room and away from other people and pets in your home. If possible, use a separate bathroom. If you need to be around other people or animals in or outside of the home, wear a cloth face covering.
- Monitor your symptoms. Trouble breathing is a more serious symptom that means you should get medical attention.

How is the virus spread?

- COVID-19 mainly spreads from person to person, similar to the flu. This usually happens when a sick person coughs or sneezes near other people and releases respiratory droplets. It may also be possible to get sick if you touch a surface that has the virus on it and then touch your mouth, nose, or eyes.

What are the symptoms of COVID-19?

- Symptoms typically start 4–5 days after exposure or infection. The symptoms are often indistinguishable from influenza (flu). The majority of patients have one or more of these symptoms: Fever, Cough, Feeling fatigued, Shortness of breath, Muscle aches/pains.

Are there medicines that I should or should not take for COVID-19?

- Currently, there are no medications specifically approved to treat or prevent COVID-19. There are over the-counter medications to manage symptoms.

How can I protect myself and my loved ones from COVID-19?

- The California Department of Public Health recommends people take steps to prevent the spread of all respiratory viruses, including COVID-19 (coronavirus):
 - Wash your hands with soap and water or an alcohol-based hand sanitizer if soap and water are not available. Wash your hands frequently, for at least 20 seconds, and certainly after sneezing or before/after touching your face or a sick person. Avoid touching your face with unwashed hands.
 - Stay away from work, school and other people if you become sick with any respiratory symptoms like fever and cough. Do not travel while sick.
 - Avoid close contact with people who are sick. People who are sick should be in a room, with the door closed, to help prevent spreading the disease to other people.
 - Avoid touching your eyes, nose and mouth.
 - Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing. If you are coughing and sneezing, isolate yourself away from others.
 - Clean and disinfect frequently touched surfaces at home, work and school.
 - Practice healthy habits: Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids and eat nutritious food.

How long should I wait to re-test if I got a negative result? Should I re-test?

- If you test negative for COVID-19, you probably were not infected at the time your sample was collected. However, that does not mean you will not get sick. The test result only means that you did not have COVID-19 at the time of testing and you should still protect yourself. If you experience symptoms in the future, you should get retested if recommended by your doctor.
- For periodic routine testing, recommended frequency include testing all staff over two months, where 25% of staff are tested every two weeks, or 50% every month to rotate testing of all staff over time.
