Free Youth Heart Screening

Help Prevent Sudden Cardiac Arrest (SCA) in Sacramento Youth

- ✓ 1 in 300 youth have an undiagnosed heart condition that puts them at risk for SCA
- ✓ #1 cause of death of student athletes
- ✓ #1 cause of death on school campuses

We are excited to share that on **Saturday, August 27, 2022**, the Kyle J. Taylor Foundation (KJTF) in collaboration with UC Davis Health and Project ADAM Sacramento are hosting a Free Youth Heart Screening for the Sacramento community at Jesuit High School. The screening is open to anyone ages 12-25 years of age at **NO COST**.

These screenings are so important! The current annual physical examinations or sports pre-participation physical exams miss about 85-90% of the issues that can cause Sudden Cardiac Arrest (SCA) in children and young adults. The issues that cause SCA in young people must be seen on an electrocardiogram (EKG) because they are structural or electrical issues that cannot be heard through a stethoscope. The EKG is a simple test that records the electrical activity of the heart using small sticky electrode patches that are attached to the skin of the chest. EKGs are quick and painless.

The screening includes cardiac risk assessment, EKG, and doctor review, which takes about 40 minutes to complete.

To learn more about SCA in youth and what happens at the heart screening please visit www.kylejtaylor.org or contact **916-627-9533** or email hs-projectadam@ucdavis.edu.

The Sacramento City Unified School District is not a sponsor, endorser, or otherwise associated with the above. Permit Number E-92.
