

## Hydration Stations at School Sites

If you are interested in having a hydration station installed at your school site please read the information below and follow the Special Projects Request process. Through the SPR process the Facilities Department can help you purchase district standard models and suggest contractors for the installation. SCUSD Facilities Department staff are not currently installing stations via work orders or capital improvement requests.

### Questions to Consider

Where will the station be located?

Is there existing plumbing and power in the selected location?

Will this replace an existing water fountain?

### District Standard Models

Single Level

Elkay Model EZSDWSVRSK

Estimated Cost - \$1010.00\*

Bi-Level

Elkay Model EZSTLDDWSVRSK

Estimated Cost - \$1,265.00\*

\*estimated cost through District vendor

### Installation

Costs will vary depending on location, access to utilities and time of year. Estimate between \$4,000 and \$6,000 for installation.
