

2018 MBER-BIOLOGY SUMMER INSTITUTE

JULY
9-12-18

ABOUT

Model Based Educational Resource Biology (MBER) is a **full-year high school biology course** developed by a team at UC Davis. MBER is intended to support students in developing a set of explanatory models in the life sciences that can be used to explain a range of phenomena related to species unity and diversity. In each unit, phenomena motivate student questions and the class works together to build explanatory models that can be used to answer their questions. This 4-day institute is designed to help you navigate the collection of MBER tools, links, strategies, and resources. In addition to the institute, you'll also receive a lifelong membership to the MBER community, as well as access to the full year of NGSS-aligned high school biology curricular materials.

WHEN & WHERE

July 9-12, 2018
9:30am - 3:30pm
Sacramento State University, Sequoia Hall
