- Once all students have logged in, select **Approve All** or approve students individually as they log in
- As students proceed independently through the test, you can pause students (individually or as a group) or terminate a student's test session as needed.

**Note**: Students must end their subtest by selecting the **End** button.

Once students have ended the subtest, they will be returned to the drawing screen where they will wait for further instructions.

• When all students complete the subtest, the proctor will select to **Continue Testing All** (which will automatically advance students to the next subtest in sequence) or **End Testing All**.

DataManager Quick Guides OManaging Self-Paced Test Sessions

• If the Proctor continued testing to the next subtest, once the next subtest is completed, the proctor can again continue to the next subtest or end testing. This process continues until the proctor selects to ends testing. To end testing, the proctor will select **End Testing All**.
