

SCUSD Mathematics

Routines for Reasoning

Professional Learning Opportunity

All SCUSD teachers are invited to engage and collaborate with colleagues in grade-band segments for a five-part learning series focused on understanding and implementing routines that promote mathematical reasoning and foster the Standards for Mathematical Practice.

Sessions will be held at the SERNA Center on Wednesdays from 4:00 to 6:00 pm.

Participants will be paid at the per session rate or may earn hours towards salary advancement.

Each session will focus on a different routine:

January 22 - Capturing Quantities

February 19 - Recognizing Repetition

March 18 - Three Reads

April 22 - Connecting Representations

May 13 - Decide and Defend

Teachers who attend will have the option of receiving individualized support with classroom implementation.

There is no requirement to attend all five sessions. Upon completion of any two sessions you can receive a copy of *Routines for Reasoning*, the book that provided the basis for this series.

Space is limited so register as soon as possible!
