

SCHOOL GUIDANCE: Sending Sick Students/Staff Home

When a student or staff member presents in the office with COVID symptoms:

1. RELOCATE

Remove the individual from the classroom and relocate to a supervised area.

2. MASK

Provide a mask for the symptomatic person, and recommend that everyone in the room wear a mask

3. SEND HOME

Contact parent/guardian for student pick up, or send the symptomatic staff member home

4. PROVIDE “COVID CARE PACKAGE”

- Give staff member or parent/guardian these 3 items:
 1. an OTC test
 2. [“OTC Reporting” flyer](#)
 3. [Stay Home Sick and Return Guidance](#)
- Review Illness and Symptoms Requirements about returning to school/work with parent/guardian or staff member
- Remind them to take the OTC test and report results to Primary
(School staff may NOT help administer, read, or interpret the OTC test)
 - **If negative:** Return when symptoms improve, and 24-hours fever free
 - **If positive:** Stay home. Notify the school office/supervisor
 - **If no COVID test taken,** remain home for 5 days

If a positive COVID test is reported to the school office, immediately email covidreport@scusd.edu and include school name, student/staff member name, and best contact information. Advise the student or staff member to isolate at home and a SCUSD Contact Tracer will be in touch soon.

Absences - When an absence is reported due to a COVID symptom, follow the [Stay Home Sick and Return to School Guidance](#) handout and advise to test. Note that a symptomatic person may not come on campus to pick up an OTC test, but they may go to a SCUSD testing center or their health care provider.

COVID Questions: Call SCUSD COVID Hotline (916) 559-0951
